

Talexion Infotainment System

Phone Pairing Guide

This guide explains how to pair your smartphone with the Talexion Infotainment System using Bluetooth. Follow the steps below for a smooth and reliable connection.

General Pairing Steps

- 1 Start the vehicle and ensure the infotainment system is powered on.
- 2 From the home screen, open 'Connectivity Hub'.
- 3 Select 'Device Pairing' and choose 'Add New Device'.
- 4 Enable Bluetooth on your smartphone.
- 5 Select 'Talexion-Link' from the list of available devices.
- 6 Confirm the pairing code shown on both the phone and the display.
- 7 Grant permissions for contacts and media access if prompted.
- 8 Wait for confirmation that pairing is complete.

Pairing with Android Devices

- 1 Open Settings and tap 'Bluetooth'.
- 2 Ensure Bluetooth is turned on.
- 3 Tap 'Pair new device'.
- 4 Select 'Talexion-Link' from the list.
- 5 Confirm the pairing request.
- 6 Allow access to contacts and media when prompted.

Pairing with iPhone

- 1 Open Settings and tap 'Bluetooth'.
- 2 Turn Bluetooth on.
- 3 Wait for 'Talexion-Link' to appear under 'Other Devices'.
- 4 Tap the device name to connect.
- 5 Confirm the pairing code.
- 6 Allow syncing for contacts and favorites.

Troubleshooting

- Ensure Bluetooth is enabled on both the phone and infotainment system.
- Restart both the phone and the vehicle system.
- Remove old pairings and try again.
- Keep the phone within 10 meters of the system.
- Update your phone software if issues persist.
- Disable other nearby Bluetooth devices to reduce interference.
